

FLWEMS Paramedics Adult Protocol for the Management of:
PATIENT DECONTAMINATION

Indications

Patients involved in a CARIA, CBRNE or a commercial / industrial / agricultural HAZ-MAT event.

Procedure

Refer to FLWEMS Paramedics Adult Protocol for the Management of CBRNE Exposures.

CAIRA/Chemical Surety Considerations

Paramedics are not expected to perform patient rescue from a contaminated environment or initial decontamination of patients.

Triage Considerations

Refer to S.T.A.R.T. Triage Protocol
